

Construction of linear B-splines from truncated power basis

Construction of a linear B-spline using second order differences of truncated linear functions. Upper panel: the truncated linear functions. Lower panel: the same functions, scaled by 1, -2, and 1, using the same colours, as well as their sum (in grey). The vertical broken lines indicate the knots where truncation takes place. R code in `f-trunc1.R`

```
# Construction of linear B-splines from truncated power basis
# A graph in the book "Practical Smoothing. The Joys of P-splines"
# Paul Eilers and Brian Marx, 2019

library(ggplot2)
library(gridExtra)
library(JOPS)

# Compute the truncated linear functions
m = 200;
u = seq(0.0, 1, length = m)
