

ROC curve for binomial signal regression (Phoneme data)

The receiver operating characteristic (ROC) curve for the logit penalized signal regression for the *aa-ao* phoneme data, optimally tuned with AIC. R code in *f-vowel-roc.R*

```
# ROC curve for binomial signal regression (Phoneme data)
# A graph in the book 'Practical Smoothing. The Joys of P-splines'
# Paul Eilers and Brian Marx, 2019

library(ggplot2)
